

Inserting Video from a File

Venus 1500 has the option to import videos from locations other than its own Daktronics Media Library.

1. On the Home tab, click on the **Media Item** button from the **Quick Insert** group. (See Figure 1)
2. Choose **Video** from the drop down menu.
3. Browse to where the desired Video is located and choose **Open**. (See Figure 2)
4. Choose **Import** from the **Video Import** window. (See Figure 3)

✔ **Tip:** You can also import a video from the **Insert** tab in the **Media group**.

✔ **Tip:** You can also import a video from the **Media Library** by browsing for your file under the **Search In** area.

Exercise

- **Exercise:** Insert a video utilizing the 3 different ways.

Figure 1: Insert a Video from the Home tab.

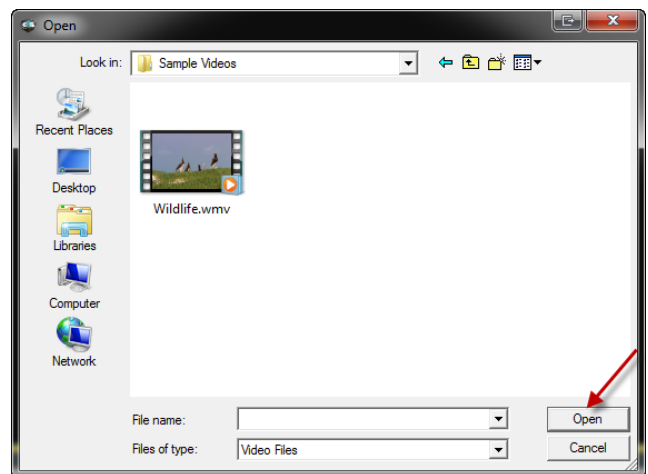

Figure 2: Browse to the video location within computer files.

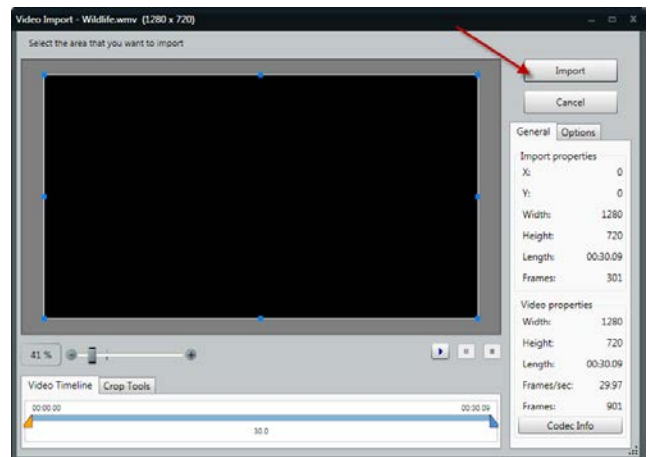

Figure 3: Import the video into Content Studio.

Accepted Video Formats:

uncompressed .avi
.mov .wmv
.mp4 .mpg .mpeg
